HOW TO PAIR TO BLUETOOTH

1. Turn on your Bluetooth Device.
2. Power on Explorer Outback.
3. Hit the disconnect button on the block rocker to ensure that no other devices are paired to the unit already.
4. Navigate to your Bluetooth device's setup screen, find "Explorer Outback" and connect. Note: If Bluetooth device prompts a pairing code, enter 0000.
5. To disconnect Bluetooth, hit the disconnect button.

TROUBLESHOOTING

PROBLEM	QUICK FIX
A high-pitched whistling noise is made when using microphone	Try pointing the microphone away from the speaker. This is feedback.
Too much bass	Adjust the tone or EQ control on your sound source to lower bass level.
Sound is distorted	Try lowering volume control of the sound source, musical instrument or microphone. Adjust Master Volume knob on Explorer outback.
Cannot play music from a flash drive	USB port is only for charging USB devices.
